What is Digital Inclusion?
Digital inclusion is the ability of all individuals to access and use information so that they are empowered to participate in and benefit from today’s growing information society.

At EVERFI, we are committed to the design and development of user experiences that everyone, including people with disabilities, can independently consume and interact with.

EVERFI’s Commitment to Accessibility
Ensuring that all learners are able to access and experience our courses

According to the World Health Organization, more than one billion people in the world have some sort of disability. EVERFI is deeply committed to ensuring that all learners are able to access and experience our digital learning courses. We call this digital inclusion.

We recognize accessibility and inclusivity are high priorities for our partners and our learners. As part of our commitment to delivering great educational and training experiences, we are dedicated to building digitally inclusive programs for all.

EVERFI’s ACCESSIBILITY STATEMENT
EVERFI solutions are designed to be accessible under the Americans with Disabilities Act (Titles II & III), Section 504 of the Rehabilitation Act, and the accessibility standards set forth by the W3Cs Web Content Accessibility Guidelines (WCAG) 2.0 and Section 508 of the Rehabilitation Act.

In our desire to improve internationalization of our solutions we will strive to comply with the updates to the European Accessibility Standard EN 301 549 “Accessibility requirements for ICT products and services” in support of the EU Web Accessibility Directive.

Our commitment to digital inclusion is key to our ability to create positive, lasting change in our communities by making digital education and training accessible to all.
